

# HERE Location Services - Self-hosted

## Run HERE Location Services on your own infrastructure or preferred cloud

HERE Technologies provides a comprehensive, diversified portfolio of location services. A wide selection of our location services can be installed and run on your own servers or cloud environment, giving you full control over data security to stimulate the growth of your business and create more monetization possibilities.

## How will self-hosting benefit my business?

Install and run HERE Location Services on your own infrastructure or with your preferred cloud provider for control over performance, data security and monetization.

### Performance

Streamline processes and ensure service availability through your company's in-house server or via your preferred cloud infrastructure

### Security

Keep location data and services within your company, behind your firewall, or with a cloud provider that provides the right level of security tools compliant with the regulations that apply to your business

### Monetization

Contain costs associated with processing large volumes of data while implementing monetization strategies that work for you

## Location services you can self-host

### → Traffic Services

Traffic flow and incident information as well as map tiles with traffic overlays\*

### → Map Rendering Services

Pre-rendered map tiles or vector data tiles for client side rendering using the Map API for JS, diverse map styles, global satellite images\*

### → Geocoding Services
